

Machine Quilting Class Supply List – with Wanda Warner

Sewing Machine in good working order. You should know how to change needles and also adjust tension on your machine.

Walking Foot (or Even Feed foot) This may already be built in to your machine.

Darning Foot This usually was included in your basic machine accessories.

Thread Invisible thread (very fine should be labeled .004)
100% 50 wt cotton - 2 spools.....1 off white and 1 any color.

Needles Klasse or Schmetz Size 70/10 or 80/12 Sharp/Microtex.
Also there is a size 75/11 Schmetz Quilting Needle.

Gloves Machingers or other brands.
These will give you some "grip" when working with your quilt.
Note: For many years I have used fingers cut from rubber gloves. Not the latex kind for food prep/medical uses.
Regular dishwashing type rubber gloves and they should fit snug.
Having said that, I have also worn out 2 pair of Machingers. So the choice is yours.

Marker Blue washout marker

Fabric 2 yds muslin We will use 1 yd for the top and 1 yd for the back, so this can be 2 1 yd pieces

Batting Cotton Batting approx. 36 x 45. Don't use polyester...too much "slippage" during the quilting process.

Also...Make a "block" consisting of 36 2" squares sewn together 6 squares x 6 squares.

Make another "block" of 6 2" x 12" strips sewn together side by side to make a 12" square.

These are "learning" blocks. Scraps will be fine.

Note: You will need a piece of **batting** for each of the above and something for the backing for each of the above.

Safety pins for layering your samples in preparation for the quilting.

Masking tape " " " " " "

A "Kwik Klip" if you have one. Makes layering easier on your fingers.

You may want to bring some kind of **cushion or pillow** for your comfort in sitting. Also if it is firm, it will provide some "lift" to raise you up a bit for good posture at the machine.
